Ecosmob to participate in
ITEXPO 2022 at Florida

Brain Pick

Are you looking to hire an
Android developer?

The first month of the quarter is about to end and we have seen hectic activity already. **Ecosmob Technologies is gearing up for the ITEXPO 2022 taking place in Florida, USA from 21-24 June 2022.** We will exhibit our comprehensive service offerings including, VoIP solutions, staff augmentation, web design and development, mobile application development, and AI/ML development services.

Ecosmob Technologies has been at the forefront of providing custom ICT solutions for over a decade now. As announced recently, we plan to expand our global footprint and cater to the need for quality software services worldwide. **At the Florida ITEXPO, Ecosmob Technologies will display VoIP solutions, staff augmentation, web design and development, mobile application development, and AI/ML development services, and exchange knowledge of the latest technologies & solutions that enterprises can embrace.**

We have also deepened our Staff Augmentation Services line. We will provide end-to-end outsourcing capabilities to its clients. Ecosmob's Staff Augmentation services help organizations accelerate their software development processes efficiently.

It caters to the unique staffing requirements of organizations by finding the right people for them. The company also offers enterprises the opportunity to hire talent for short-term project requirements as well as build remote teams with people who fit the exact job description.

The five work areas in which Ecosmob's Staff Augmentation services have been ranked among the best include DevOps, QA, L1 and L2 support engineers, and developers for both the iOS and the Android platforms.

All you need to know about WebRTC

WebRTC development is a mechanism to enable real time communication directly on the web. It is often said to be a simple yet complex process.

WebRTC is supported by major browsers like Chrome, Firefox, Safari, Opera, and Microsoft Edge platforms like Android and iOS. It does not need any external plugins installed in your browser, as the solution comes bundled with the browser [Read more](#)

A Complete Guide on OpenSIPs

Building robust IP telephony solutions requires strong infrastructure. OpenSIPS is one such open-source platform that is widely used by telecommunication service providers. Though not as popular as Asterisk, OpenSIPS solution development is widely recognized as a core part of telecom infrastructure given its capacity, robustness, and speed [Read more](#)

FTC initiates action to stop VoIP providers from facilitating illegal telemarketing robocalls

The Federal Trade Commission today took action against Voice over Internet Protocol (VoIP) service provider VoIP Terminator, Inc., a related company, and the firms' owner for assisting and facilitating the transmission of millions of illegal pre-recorded telemarketing robocalls, including those they knew or should have known were scams, to consumers nationwide. Many of the calls originated overseas, and related to the COVID-19 pandemic, with [Read more](#)

Microsoft to add Teams to its own store

Microsoft recently updated the Microsoft 365 Roadmap with a new entry signaling the upcoming release of Teams in the Microsoft Store. Currently, the only way to get the messaging app is to download it from the official website. Teams in the Microsoft Store will provide Windows 10 and 11 users with a simpler and more convenient way to install the program [Read more](#)

What our Customers say?

Ecosmob is knowledgeable and get's it.
With an understanding of the business case
and the go the extra mile.

Nick Aldewereld,
Nima Connect B.V.

Tirth and Manish were great. Delivered
above expectations. Took a little longer
due to delays in communication due to
time zone differences, but they went
above and beyond to try and remedy this
issue. Design work was incredible and
we are very happy.

Josh Harmatz,
Loanpal
