Ecosmob team gears up for Florida ITEXPO

Brain Pick

Ecosmob Technologies to Exhibit at ITEXPO Florida 2022

The tech world is like a constant torrent. As we settle down and offices worldwide open doors to their employees once again, the buzz is returning. The Ecosmob office is also abuzz with activities and events. **We are inching closer to the ITEXPO 2022 in Florida, USA, from 21-24 June 2022.** Our teams are working in full swing to showcase our innovative works encompassing VoIP development services, AI/ML solutions, DevOps, mobile and web application development, and staff augmentation services.

Since 1999, ITEXPO has been an event where telecom and IT professionals, including C-level executives, business owners, developers, engineers, and channel partners, gather to exchange knowledge during sessions and carry out business. It serves as the annual meeting point in South Florida for buyers of communications and technology hardware and services. During the three days, participants witness hectic networking and business activity.

Ecosmob Technologies has emerged as a leading custom ICT solution provider. We leverage the latest technologies to innovate and create custom software for diverse industries across geographies. **At the Florida ITEXPO, our focus will be on helping organizations enhance and develop capabilities through VoIP solutions, staff augmentation services, web design and development, mobile application development, AI/ML solutions, and DevOps.**

To meet the demand for qualified IT resources, we have now started offering our staff augmentation services across new territories. The tech industry is facing one of the most acute talent gaps. Globally, nearly 7 in 10 (69%) companies have reported talent shortages and difficulty in hiring, which is at a 15-year high.

This has also led to an increase in the cost of doing business in the digital economy. With our agile staff augmentation model, organizations find it easy to find the right talent for the right job.

We endeavor to help organizations of all sizes grow and excel without facing the hurdle of qualified tech talent.

Illegal VoIP: What is it? How to detect and prevent it?

Technologies like VoIP and cloud communication have become a crucial component of business and criminal activities. As per the VoIP Fraud Analysis **report**, Simwood, 2015, a leading VoIP service provider, had undertaken toll and dial-through frauds costing its consumer more than 46 billion USD. The only way to limit illegal VoIP or grey traffic is to develop techniques to detect such calls. It requires analysis of IP traffic to detect, block or charge such illegal VoIP calls [Read more](#)

How to find the best React Native Developer for your application

As an open-source platform enabling cross-platform development of hybrid mobile applications, it is one of the most sought-after frameworks. Many well-known organizations like Meta, Bloomberg, Airbnb, Instagram, Skype, and Pinterest, now use React Native. As the approach effectively uses an open-source JavaScript framework so, when **hiring React Native Developer**, one should consider the following key aspects. [Read more](#)

Tech companies are eliminating requirements to attract workers

The tech industry is plagued by chronic talent shortages. Estimates reveal that over 450,000 cybersecurity positions alone are languishing due to shortage. Many companies, including tech firms, are now dropping the mandatory requirement for bachelor's degrees for middle-skill and few high-skill positions, according to a **recent study** from Harvard Business Review and Emsi Burning Glass, a leading data company [Read more](#)

Google's DeepMind says it is on the verge of achieving human-level AI

DeepMind, a British company owned by Google, may be on the verge of achieving human-level artificial intelligence (AI). Nando de Freitas, a research scientist at DeepMind and machine learning professor at Oxford University, has said "the game is over" regarding finding the solution to the most difficult challenge of achieving artificial general intelligence (AGI) [Read more](#)

What our Customer say?

Industry's leading publications abuzz with Ecosmob

Ecosmob team gears up for Florida ITEXPO; Maulik Shah joins as a panelist

With the IT Expo Florida just around the corner, the Ecosmob team is ready to set sail across the shores and showcase its diverse service offerings. Our Co-Founder & CEO, Maulik Shah, will join as a panelist and throw light on one of the most critical aspects deliberated in every boardroom— 'Driving Revenue and Customer Value in a Digital World'. The session will be held on June 23, 2022, at 3:00 PM EST.

This session will uncover some of the challenges that service providers face – especially in highly competitive markets – and opportunities to increase their value, whether through increased use of their data and analytics, their networks, or new services and technologies.

Ecosmob set to participate in DigiCon Florida

The DigiCon, one of the biggest confluence of the industry to be held in Florida, US, from 24th June 2022 onwards, will see participation from Ecosmob. Our Senior Manager (Marketing), Priyanka Tiwari, will represent Ecosmob Technologies at the meet.

Ecosmob is a leader in VoIP software development, also revered for solution development in high growth technology spaces such as Unified Communications, Artificial Intelligence and Machine Learning, DevOps, and Web and Mobile application development, among others.
