Ultimate Guide to Choose the Best VoIP for Small Businesses in 2022

If you want your business communication to move smoothly, business VoIP phone service has been proven to establish most of the difference. Many companies and small enterprises choose Business VoIP phone service instead of landlines. Using this kind of internet phone service can be cheaper than presenting a conventional telephone line. Choosing the right business VoIP service providers for the employees' needs takes into consideration [Read more](#)

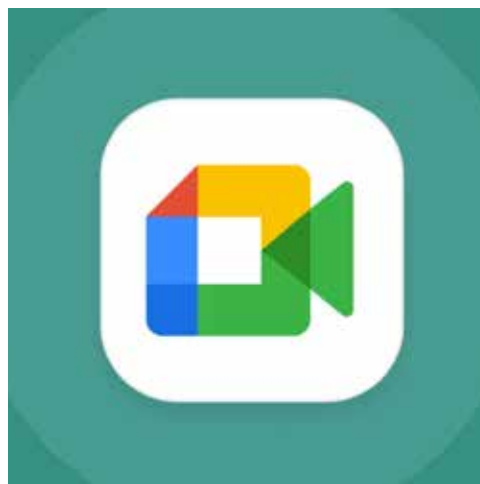

Benefits and Applications of Asterisk Solution for Your Business

Asterisk is an open-source, Linux-based PBX software solution. Developers can customize it to the needs of the business. Because Asterisk's solution is robust and economical, solutions built on it are incredibly cost-effective for the company because they lower running costs significantly. Regardless of the size of your business, Asterisk Development will benefit you because it offers a wide range of basic and advanced capabilities. Solutions based on Asterisk can help you [Read more](#)

Google Meet Automatically Adjusts the Volume

Google Meet can adjust participants' audio to ensure everyone has the same volume. Other features from this week's updates include changes to Google Classroom notifications and the capability to insert Google Maps place chips into your Google Docs. As a result of participants using different devices to join meetings, the volume levels can vary from person to person. Google Meet's new automatic volume level adjustment feature is now available and promises to create [Read more](#)

Tackling Microsoft Teams One Location at a Time

Over the last few years, Microsoft Teams has become the central hub for hybrid work. The platform connects people through voice, chat, and video and across the broader collaboration ecosystem – bringing in other Microsoft services such as SharePoint and OneDrive, as well as a host of third-party platforms. With this in mind, more and more employees are living their work lives in Teams than ever before, making it essential for businesses that Teams [Read more](#)

All you need to know about Tragophone: Join us at the GITEX Global Event

We're excited to announce our participation at Gitex Global Event on 10-14 October 2022 and thrilled to showcase the Tragophone softphone that embodies our finest pick of VoIP implementation at Booth No. : Z3 - E45.

Our Tragophone is a heartthrob bringing zest to enterprises wanting to experience WebRTC-powered mobile dialers and SIP. Our exclusively engineered softphones satiate the requirements of enterprises and end-users at the center, from varied communication features to audio/video calls and file sharing, transforming regular interactions into advanced business meetings.

Ecosmob at Unified Communication Expo, London

Ecosmob Technology is set to mark its attendance at Unified Communication Expo, London. The event highlights UC collaboration, AI, security, future work strategy, and integration of customer contact and technologies.

Regarding UC Collaboration, It is noteworthy to learn that Ecosmob delivers excellence through Unified Communications Solutions. In 2021, Ecosmob secured its place in one of the top 10 Unified Communications Solutions providers by CIO Insider magazine. We are an award-winning IT solutions provider setting new benchmarks with advanced VoIP solutions, a proven track record of delivering core offerings, global clientele, and robust experience in market competencies.

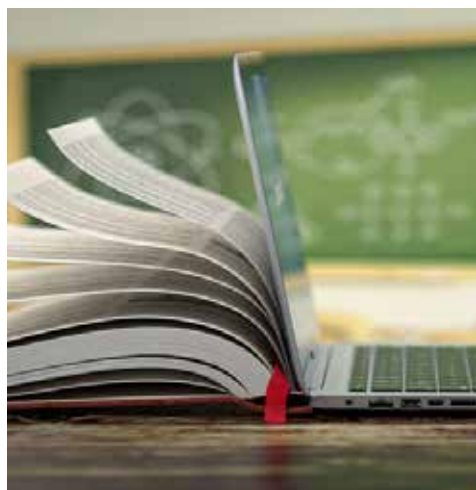

More Than Half of Remote Call Center Agents Would Quit if Recalled to the Office

Call center agents are no exceptions. Many agents switched to remote work during the pandemic because keeping workers safe in packed call centers was difficult, if not impossible. Luckily, it's straightforward to transition a call center agent to a home-based worker, especially with a cloud-based contact center solution. A **recent survey** from Playvox asked agents about their desire to return to the office, the benefits of flexible work arrangements, and how they'll respond if their company no longer supports remote work. Playvox [Read more](#)

Building a Business Case for UC in Education

The pandemic accelerated the digital transformation of virtually every industry. Overnight, countless organizations were forced to shift away from legacy tools, systems, and processes, to embrace a more agile, flexible future in the cloud. Not only did the way we work change forever, but our attitudes towards learning and the nature of education evolved too. Even now, as pandemic restrictions ease, the educational landscape remains [Read more](#)

Ecosmob Technologies heralds a new age of communication. We build smart IT solutions that are high-end and help businesses grow their customer base. Our machine learning solutions empower AI to mimic the way your customers interact with your business.

VoIP, of course, is our forte.
